Available in the Medical Education Media Center (Rm. M2-C04A)
Monday – Friday, 8 a.m. to 8 p.m.
Phone: 235-1864 or 235-1832

The following information provides a descriptive list of Board study audiovisual and online resources purchased by the Medical Education Media Center **restricted to use by UMKC faculty, staff, students and residents**. Review items are available for USMLE Steps 1-3 and medical specialty boards, such as internal medicine.

Online Resources for Board Study - Exam Master is an online question bank designed and maintained for all levels of review. The subscription is paid for by the Medical Education Media Center and is free for UMKC School of Medicine access only. A one-time registration is required. However, re-registration is required if the system is not accessed for 9 months. See information below:

REGISTRATION

Registration requires the use of your UMKC email account and your legal name. Passwords can be changed at anytime. UMKC faculty and students can register for Exam Master through the gateway link on the Medical Education Media Center web site at:

www.umkc.edu/medicine/mediacenter or if you prefer, www.umkc.edu/medicine/memc

Overview of Exam Master:

Here's some quick facts about Exam Master. Established in 1994, Exam Master Corporation is well known for USMLE and Medical Subject exam preparation materials in electronic format. They offer Schools of Medicine an advanced web-based system for board study, exam development, test delivery, score tracking, and performance reporting. A high percentage of medical schools subscribe to Exam Master, including Baylor, Columbia University, George Washington, Johns Hopkins, Penn State, Rush, Stanford, Michigan, and Yale.

In 2006, they introduced a revised USMLE* testing interface which includes the following features:

- Custom exam building—*allows study by subject*
- Pre-built exams available for USMLE products – allows random questions
- Provides the look and feel of the Board Exams
- Timed test & study modes
- Pause/resume capability in test and study modes
- Time Remaining displays for Test and Study Modes
- Explanations shown for all questions in Study Mode
- Mark questions for later review
- Normal Labs access from all questions
- Detailed score reporting
- User Name and Password secured access
- Worldwide access from any Internet connection

Currently, Exam Master offers over 17,000 questions, with the content produced by over 100 MD's and PhD's. Question categories and numbers are:

- USMLE Step 1 - 8,700+
- USMLE Step 2 - 4,700+
- USMLE Step 3 - 2,900+
- All Steps include vignette & case related, non-vignette/recall, and medical subject questions
- Family Practice Certification Exam - 5,400+
- Internal Medicine Certification Exam - 4,500+
- OB/GYN Certification Exam - 850+
- Pediatrics Certification Exam - 900+
- Surgery Certification Exam - 1,300+
- SPEX - Special Purpose Exam - 7,100+
- Medical Subjects

- Biochemistry - 1,300+
- Anatomy - 500+
- Cytology & Histology - 1,200+
- Medical Microbiology - 1,000+
- Pathology - 950+
- Physiology - 1,600+
- Internal & Clinical Medicine - 2,450+
- Psychiatry - 1,100+

Audiovisual Resources Board Study – Audiovisual and other media resources are organized by step level in four parts (step 1, step 2, step 3 and Internal Medicine Board Review). Each level is further subdivided into the media format (audio CD's, DVD's, video, etc.)

Software for Step 2

ALERT USMLE Step 2 - [Appleton & Lange's Electronic Review and Testing], published by Appleton & Lange / McGraw-Hill (Win/MAC Hybrid CD-ROM)

Software package for board review contains over 2,200 USMLE-type questions and five simulated USMLE-type tests and includes a guide to efficient exam preparation from the Appleton & Lange "First Aid for the USMLE Series."

MKSAP for Students 3, American College of Physicians, c2006 (CD-Rom + book)

MKSAP for Students CD features 408 patient-centered, self-assessment questions with critiques of the correct and incorrect responses. The CD version automatically tracks progress, assesses areas for further focus, and enables both category-based and random question ordering. A full text search engine enables searching of both the questions and the critiques for specific terms or phrases, and offers complete references linked directly to PubMed. The text is essentially the printed version of the CD-ROM, without the various electronic features.

Designed for medical students participating in their clerkship rotation, the questions help define and assess mastery of the core knowledge base requisite to internal medicine education in medical school. The questions provide a concise review of the management dilemmas faced daily by internal medicine physicians. The questions begin with a clinical vignette, and are organized into the 33 categories that correspond to the Core Medicine Clerkship Curriculum Guide's "Training Problems." The Clerkship Curriculum Guide is a nationally recognized curriculum created and published by the Clerkship Directors in Internal Medicine (CDIM) and the Society for General Internal Medicine (SGIM). It defines competencies, knowledge, attitudes, and skills that medical students are expected to master by the end of the clerkship.

NMS (National Medical Series for Independent Study) USMLE Step 2 ; published by Lippincott, Williams & Williams (WIN CD-ROM)

This program provides over 900 USMLE-style questions and clinical vignettes make testing mode a timed simulation of actual Step 2 for board review. Tutorial mode provides detailed answers for more in-depth review. Results option in testing or tutorial model for statistical breakdown of progress.
